

DEMOLITIONS with explosives offer a safe and rapid destruction of buildings, structures and other civil works. MAXAM's Technical Applications Group (TAP) works with customers to define and execute all type of demolitions, both in concrete, steel and combinations.

APPLICATIONS

✕	Standard and industrial bulidings
✕	Bridges
✕	Other civil works

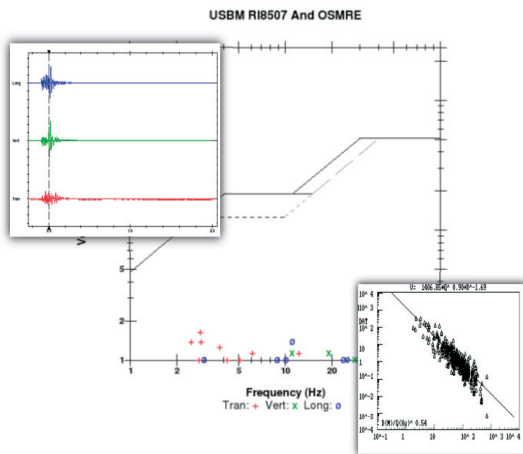

BENEFITS

- ✕ Rapid demolitions
- ✕ Low impact to surroundings
- ✕ Low environmental impact
- ✕ Increases safety and compliance

MAXAM's experienced technicians use state-of-the-art technologies, products, tools and MAXAM's global expert network to design and implement demolition operations anywhere in the world.

All operations comply with applicable regulations and meet stringent safety, vibration and air blast requirements.

Risk assessments and safety reviews are an integral part of all demolition operations
