

The Directive 2008/43/EC of 4th April, 2008, and the Directive 2012/4/EU of 22nd February, 2012, about explosives identification and traceability for civilian use, establish a harmonized system for the unique identification and traceability of explosives for civilian uses in Europe.

MAXAM has developed a digital platform called RIOCLOUD, where information and solutions can be found for you to carry out the new legislation in an easy way.
